Projects

LUTHER CONSTRUCTION

- Utilized MERN stack to create custom website for the client to allow their clients to request projects and the owner to accept ordeny projects.
- Had originally designed in AngularJS, went back and refactored into React.
- Project enhanced my familiarity with redux and knowledge of using state and props in react components.

tech used: HTML, CSS, Javascript, React, NodeJS, ExpressJS, MongoDB

STEPHEN TYLER DEV

- Utilized React to display select projects showcasing my growth in web development.
- Project helped build my confidence in compartmentalizing front end of applications and dynamically displaying images.

tech used: HTML, CSS, Javascript, React
